Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 15-18, 20, 21, drawn to a method for applying a coating composition to an article, classified in class 427, subclass 407.1.
- II. Claim 24, drawn to an article, classified in class 428, subclass 411.1.

Distinctness

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as a process wherein the step (f) of curing a first, second and third layers is carried out by heat; or a process wherein the first or second composition is in a powder form.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
